Collaborative Approaches for Supporting Survivors of Female Genital Mutilation/Cutting (FGM/C).

A collaborative community-based project that aims to engage, empower and support women affected by Female Genital Mutilation/Cutting.

Working to develop a promising practice that increases the efficacy of a Toolkit for survivors, healthcare and community service providers with regards to FGM/C.

ABOUT US

WOMEN'S HEALTH
IN WOMEN'S HANDS
COMMUNITY HEALTH CENTRE
INCREASE • INNOVATE • IGNITE

Women's Health in Women's Hands Community Health Center provides primary health care to women from the African, Caribbean, Black, Latin American and South Asian communities in the greater Toronto area.

Our research programs are informed by the voices of the women we serve and are focused on the critical goal to generate knowledge that improves the lives and health of racialized women.

1

Develop education and awareness-raising resources for survivors of FGM/C and healthcare and community service providers.

-
- Webinars
 - Workshops
 - Podcasts
 - Access Website
 - And more...

2

Strengthen support systems for survivors of FGM/C and those at risk through implementation of the service providers' framework.

Engage more than 100 healthcare and community service providers and 5,000 survivors and their families on issues of gender-based violence and FGM/C.

3

Develop a sustainable virtual access pathway to support linkage to care and referral for survivors and women at risk aged 16 years and over.
